

# DOUBLE OVEN ULTRA PRECISION OCXO MV360M

## Features:

- High stability vs. temperature: up to  $\pm 3 \times 10^{-11}$
- Standard frequency: 10.0 MHz
- Standard package: 50.8x50.8x19 mm
- High long-term stability: up to  $\pm 1 \times 10^{-8}/\text{year}$
- Power supply: 5 V and 12 V
- Analog or Digital frequency control
- Applications: 5G, Telecommunication, Test & Measurement

| Supply voltage |  |
|----------------|--|
| 5 V            |  |
| 12 V           |  |

| Type of frequency control |  |
|---------------------------|--|
| -                         | Analog frequency control                   |
| D                         | Digital frequency control I <sup>2</sup> C |
| SPI                       | Digital frequency control SPI              |

## ORDERING GUIDE: MV360M – C 003 D – 12V – 10.0MHz – D – LVCMOS

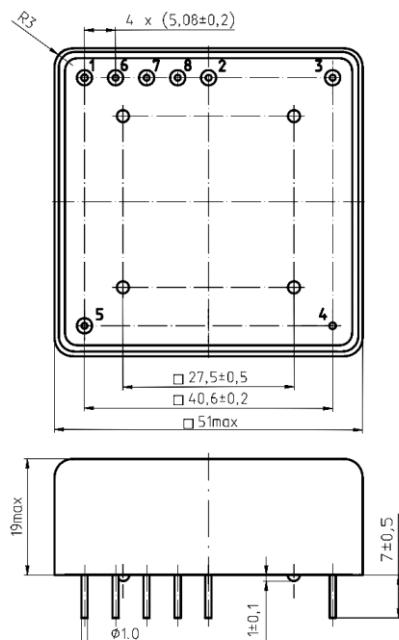

| Availability of certain stability vs. operating temperature range |             | $1 \times 10^{-10}$ | $5 \times 10^{-11}$ | $3 \times 10^{-11}$ |
|---|-------------|---------------------|---------------------|---------------------|
|   |             | +                   | +                   | +                   |
| 01  | 005         | 003                 |                     |                     |
| A   | 0...+55°C   | A                   | A                   | A                   |
| B   | -10...+60°C | A                   | A                   | A                   |
| C   | -20...+70°C | A                   | A                   | A                   |
| D   | -40...+70°C | A                   | A                   | A                   |
| EU  | -40...+75°C | A                   | A                   | A                   |
| EX*   | -40...+85°C | A                   | A                   | A                   |

A – available

\* for 5V only

| Availability of certain aging values for certain frequencies |                                    |
|--|------------------------------------|
| F  | $\pm 5 \times 10^{-8}/\text{year}$ |
| E  | $\pm 3 \times 10^{-8}/\text{year}$ |
| D  | $\pm 2 \times 10^{-8}/\text{year}$ |
| C  | $\pm 1 \times 10^{-8}/\text{year}$ |

| Phase noise, dBc/Hz | SIN   |       | LVCMOS |
|---------------------|-------|-------|--------|
|                     | ~, D  | SPI   |        |
